New Mexico COVID-19 Vaccination Research & Messaging Survey Findings

Join the UNM Center for Social Policy and the New Mexico Department of Health via Zoom for a webinar to discuss the results from a recent state-wide COVID-19 vaccination messaging survey.

The webinar will focus on how organizations in the state can draw from the survey's results to improve vaccination outreach to diverse communities. It will also highlight the survey's other focus on discrimination experiences New Mexicans encounter within the health care system and the economic stressors communities face across the state.
